Since being elected to be part of the General Assembly, what have you done to represent the student voice in the chamber and in other relevant circumstances?

Since being appointed to the General Assembly, I have either supported legislation that I feel will have both short-term and long-term benefits to the student body and my constituents in the College of EHE. On the other side of that coin, I have voted against legislation that I feel provides no real benefits or may well damage the integrity of the student body. Outside of the chamber, I have also worked to support change where there are flaws in the wider university and its administration. I have also been vocal about issues that are important to me or important to my constituents (most recently the mold at Lawrence Tower).
